This table shows the markups several Fine Art America Artists are using when pricing their work. All of them do sell really well.

Some of the markups are rounded (for example \$77.77 is \$ 78).

Please note: these are markups (the artist revenue), the final sales price is way higher.

The cursively formatted markups from Artist 1 are not considered in the "On Average" sum. This pricing strategy is very unique and would skew the "On Average" markup.
